

Understanding Fire Extinguishers and Fire Safety – Assignment

1. What is Fire Safety?

Fire safety refers to rules and actions designed to prevent fire incidents, respond quickly during emergencies, and protect people and property.

2. What is a Fire Extinguisher?

A fire extinguisher is a safety device used to extinguish small fires in emergency situations.

3. Types of Fire Extinguishers and Their Use:

- 1 Water Extinguisher – for Class A fires (wood, paper, cloth).
- 2 Foam Extinguisher – for Class A & B fires (solid & liquid fuels).
- 3 Dry Chemical Powder (DCP) – for A, B, and C fires; including electrical fires.
- 4 CO₂ Extinguisher – for electrical and flammable liquid fires.
- 5 Wet Chemical Extinguisher – for kitchen fires (oil and grease).

4. Classes of Fire:

Class A: Solids like wood, paper, cloth. Class B: Flammable liquids like petrol, diesel. Class C: Gas fires like LPG & CNG. Class D: Metal fires. Class K/F: Cooking oil fires.

5. PASS Method to Use Fire Extinguisher:

P – Pull the pin A – Aim the nozzle at the base of the fire S – Squeeze the handle S – Sweep side to side

6. Fire Safety Precautions:

- Keep emergency exits clear
- Ensure fire alarms and extinguishers work
- Maintain kitchen and electrical safety
- Have an emergency plan
- Use extinguishers only if trained

7. Conclusion:

Understanding types of fire extinguishers and using the PASS method helps ensure fire safety in homes, schools, and workplaces.
